

# D0099510 Drum

Also compatible in A2309510 applications!

NA Trading and Technology is proud to introduce the first aftermarket universal drum for use in Ricoh Aficio MP4000 and MP5000 machines. Dealer feedback of the OEM version of this drum prompted us to look into creating a product that could be used universally in both the A2309510 and D0099510 applications.

Our universal end cap is what makes this drum unique. It provides an innovative solution that enables service organizations to reduce inventory demands by stocking just one drum for both applications.

NATT's universal D0099510 drum passed our in-house and field testing, and produced life improvements in both the A2309510 and D0099510 applications. This high performance drum provides tremendous cost-per-copy value by reducing both parts and service expenses, and is only available from NA Trading and Technology.
