

Increasing Involvement in Kyocera Machines

MINNEAPOLIS, MN (Dec. 03, 2014) - Since 1983, NA Trading and Technology has been a dependable supplier for OEM-compatible copier parts and supplies. With over 15 distinguishing brands in the copier industry, NA Trading is continuously working to expand their offerings of OEM compatibles. Gaining their start in manufacturing Konica toner filters, it has been a gradual growth to include other OEM name brands such as Canon, Ricoh, Sharp, and Toshiba in their product line; however, voids still remained as copier brands emerged.

Most notably was the limited involvement with Kyocera-Mita compatible supplies. NA Trading took this under consideration responding to customer input, and broadened their line of Kyocera compatible products.

These products include an extensive string of Waste Toner Bottles – the most ordered and needed part for many dealerships – as well as new drums and toner cartridges. The newest of which is the TK-592 color toner released this past September with the TK-1142 cartridges planned to be released in December.

NA Trading continues to search for improvements to their catalog where they could be providing for clients. If you have any product suggestions, please call a Product Specialist at 800-231-8434 or leave [feedback](#) on their website.
