

NA Trading and Technology adds more Sharp color

MINNEAPOLIS, MN (Oct. 9, 2020) – NA Trading and Technology, provider of the best value aftermarket copier parts and supplies, is pleased to announce the release of our latest CMYK toner set for Sharp, the MX-61NT applications.

Developing color toner products can be perilous; nothing ruins a good reputation faster than bad toner, and we've worked hard for more than 35 years to earn our reputation as the premier supplier of aftermarket parts and supplies.

At NA Trading and Technology, we understand that during difficult times many dealers are looking for ways to reduce costs but do not want to risk their good reputations. Our extensive testing shows that our new MX-61NT toners are up to the challenge.

Our research and development team tested three different formulas and ran over 500,000 pages to find a product that will match the performance of the OEM. They reported yields higher than OEM in color stations, yields equal on K, good fusing, and copy quality identical to OEM.

To learn more about the work we do to ensure our products provide quality and value, call 800-231-8434 and speak with your dedicated product specialist.
