

NA Trading offers new opportunities to Be Green, Earn Green!

BLOOMINGTON, MN (April 28, 2023) – NA Trading and Technology Recycling Program is an excellent initiative to promote sustainable and environmentally friendly practices in the copier industry. Participating in this program allows you to responsibly dispose of your used or outdated components.

In addition to promoting sustainable practices, participating in the Recycling Program provides financial benefits. Recycling your cores helps to reduce the cost of producing new parts and supplies. Furthermore, participating in this program allows you to earn credit if your cores are eligible! We will always handle the shipping cost regardless. The NA Trading and Technology Recycling Program is a win-win for the environment and your bottom line.

To see what cores and products are eligible, please click the link below:
